Summary

Experienced full-stack JavaScript developer with a proven track record in quickly learning and implementing new technologies.

Technical Skills

JavaScript · React · Redux · Git · Next.js · Node.js · Tailwind · CSS · Typescript · MongoDB · Express.js · Mongoose · Docker · Redis

Experience

Natours (Full Stack pet project)

natours-frontend-c8da54608917.herokuapp.com

04/2023 - 11/2023

This project is a fictional nature tours booking website developed with a mix of cutting-edge tools and technologies. On the front-end, I leveraged the power of Next.js, Tailwind CSS, and raw CSS. For the back-end, I built the application using Node.js, MongoDB, ExpressJS, and Mongoose. The project also features integrations with Stripe for payment processing, AWS S3 for storage, Docker for containerization, Redis for caching, and Mailgun for email interactions. Each tool was chosen thoughtfully to meet the project's unique requirements and provide an optimal user experience.

Front End Developer

alpha.canadamin.com

Delikeys (Maya B LLC) · Florida, FL

05/2021 - 11/2023

In my 2.5-year tenure at Delikeys project, I played a pivotal role in developing the frontend of an application designed to improve warehouse operations. It successfully increased parcel shipping efficiency and reduced staff workload.

Education

The Complete Bootcamp (Udemy)

Self-education · Online

11/2023

Mastered the modern back-end stack including Node, Express, MongoDB and Mongoose, and applied knowledge to build a practical, dynamic application from scratch. Skilled in constructing a robust RESTful API and performing CRUD operations with MongoDB. Gained insights on working with data in NoSQL databases, implemented advanced authentication and security measures, and acquired hands-on experience in server-side website rendering with Next.js . Further developed proficiency in Stripe credit card payments, handling email interactions, file uploads, and deploying applications to production.

Front-end

Self-education · Online

05/2021

Acquired proficiency in Front-end development through self-education and practical application. Gained in-depth knowledge and practical experience in using JavaScript, React, and Redux for creating innovative applications.

City construction

Lviv Polytechnic National University · Lviv, Ukraine
